

EXECUTIVE FORENSIC REPORT

Case ID: CIP-B105-CS1_C11-26-DFIT-17300

Examiner: Simon Friday Adeka

Date: 06/09/2026

Subject: Browser History Analysis - Craigslist Fraud Investigation

1. EXECUTIVE SUMMARY

This report documents the forensic analysis of browser history artifacts from the `chrome\_history.db` file provided in Case CIP-B105-CS1_C11-26-DFIT-17300. The investigation reveals a 6-stage fraudulent activity where the suspect advertised an item on Craigslist, communicated with a victim via Gmail, provided a fraudulent Bitcoin transaction ID, and created a counterfeit payment receipt.

Key Findings:

1. Stage 1 - Advertisement: Suspect logged into Craigslist and posted an advertisement at 2022-04-19 13:55:05 UTC.
2. Stage 2-3 - Communication: Suspect accessed Gmail at `2022-04-19 13:58:40 UTC` to send payment instructions.
3. Stage 4 - Fraudulent TXID: A fake Bitcoin TXID `517b2156914944339a96137ad8978408ea52b2fc144c98d3b0b16b21888afdc5` was sent to the victim.
4. Stage 5 - Verification: Suspect verified the fake TXID on blockchain.com, kraken.com, and `mempool.space` at `2022-04-19 14:59:01 UTC`.
5. Stage 6 - Counterfeit Receipt: Suspect downloaded `proof\_of\_payment.png` from Imgur at `2022-04-19 14:56:58 UTC` to send to the victim.

Conclusion: Digital evidence confirms premeditated fraud with intent to deceive. All evidence files maintain verified SHA256 hash values for chain of custody.

2. METHODOLOGY & TOOLS

Evidence Source: chrome_history.db located in /media/sf_FTK_Case_File/

Analysis Environment: Kali Linux, SQLite3

Tools Used: sqlite3, sha256sum, zip

Process:

1. Evidence files were copied to a working directory and SHA256 hashes generated to preserve integrity.
2. Database schema was verified before query execution.
3. Targeted SQL queries were executed to extract timeline, URL, download, and search artifacts.
4. All findings were documented with timestamps in UTC and exported to CSV/TXT for reporting.

3. EVIDENCE INTEGRITY

To maintain chain of custody, SHA256 hashes were generated for all source evidence files.

4. FINDINGS & TIMELINE ANALYSIS

4.1 Database Verification

Prior to analysis, the database schema was verified to confirm the existence of relevant tables.

Fig 1: Database Schema Verification

Output of `.schema` downloads command on `chrome_history.db`. Verified table structure including `target_path` and `tab_url` columns prior to conducting forensic queries for downloaded evidence.

```
(simon@kali)~/Case2_Browser/02_Analysis$ sqlite3 ../01_Evidence/chrome_history.db ".schema downloads"
CREATE TABLE downloads (id INTEGER PRIMARY KEY,guid VARCHAR NOT NULL,current_path LONGVARCHAR NOT NULL,target_path LONGVARCHAR NOT NULL,start_time INTEGER NOT NULL,received_bytes INTEGER NOT NULL,total_bytes INTEGER NOT NULL,state INTEGER NOT NULL,danger_type INTEGER NOT NULL,interrupt_reason INTEGER NOT NULL,hash BLOB NOT NULL,end_time INTEGER NOT NULL,opened INTEGER NOT NULL,last_access_time INTEGER NOT NULL,transient INTEGER NOT NULL,referrer VARCHAR NOT NULL,site_url VARCHAR NOT NULL,tab_url VARCHAR NOT NULL,tab_referrer_url VARCHAR NOT NULL,http_method VARCHAR NOT NULL,by_ext_id VARCHAR NOT NULL,by_ext_name VARCHAR NOT NULL,etag VARCHAR NOT NULL,last_modified VARCHAR NOT NULL,mime_type VARCHAR(255) NOT NULL,original_mime_type VARCHAR(255) NOT NULL, embedder_download_data VARCHAR NOT NULL DEFAULT '');
(simon@kali)~/Case2_Browser/02_Analysis$
```

Fig1_Schema_DownloadsTable.png

4.2 Stage 1: Craigslist Advertisement

The suspect accessed Craigslist and posted an advertisement.

Fig 2: Stage 1 - Craigslist Advertisement Evidence

Query output from chrome_history.db showing Craigslist account login at `2022-04-19 13:54:22 UTC` and advertisement posting at `2022-04-19 13:55:05 UTC` via post.craigslist.org. This establishes the initial stage of the fraud.

4.3 Stage 2-3: Gmail Communication

Following the post, the suspect accessed Gmail to communicate with the victim and exchange payment details including the fraudulent TXID.

Fig 3: Stage 2-3 - Gmail Communication Evidence

Query output showing suspect accessed Gmail at `2022-04-19 13:58:40 UTC`.

This corresponds to Stage 2-3: sending payment instructions and receiving/sending the fraudulent TXID

utc_time      url
title
-----
2022-04-19 13:58:40  https://mail.google.com/mail/

```

Fig3_Gmail_Access_Communication.png

4.4 Stage 6: Download of Counterfeit Receipt

The suspect downloaded a counterfeit payment receipt from Imgur to deceive the victim.

Fig 4: Stage 6 - Download of Counterfeit Receipt

Query output from downloads table showing `proof\_of\_payment.png` was downloaded from `https://i.imgur.com/` at `2022-04-19 14:56:58 UTC`.

The file was saved to `/home/simon/Downloads/proof\_of\_payment.png`

4.5 Stage 5: Blockchain Verification of Fake TXID

Prior to sending the fake receipt, the suspect verified the fraudulent TXID on multiple blockchain explorers, demonstrating intent.

Fig 5: Stage 5 - Blockchain Verification Activity

Query output showing suspect searched the fraudulent TXID

`517b2156914944339a96137ad8978408ea52b2fc144c98d3b0b16b21888afdc5` on blockchain.com, kraken.com, and mempool.space between `2022-04-19 14:59:01` and 15:01:33 UTC.

This demonstrates intent to deceive the victim with false payment confirmation.

Fig5_Blockchain_Verification_TXID.png

5. CONCLUSION

The forensic analysis of `chrome\_history.db` provides clear digital evidence of a coordinated fraud scheme. The timeline establishes:

1. Opportunity: Advertisement posted on Craigslist.
2. Communication: Contact established via Gmail.
3. Deception: Fraudulent Bitcoin TXID provided.
4. Intent: Verification of fake TXID on blockchain explorers.
5. Execution: Delivery of counterfeit payment receipt.

All artifacts were extracted using forensically sound methods with verified hashes. The evidence supports a finding of intent to defraud.
